

Multipurpose System

Hale Multipurpose Partitioning System

The Hale Multipurpose Partitioning System uses LAMINEX COMPACT Laminate a self supporting high pressure laminate, based on thermosetting resins, homogeneously reinforced with cellulose fibres and decorated both sides with a melamine surface. This results in a product with maximum resistance to graffiti, vandalism, water and impact. It is a high-grade solution with the utmost flexibility.

Laminex Compact Laminate offers seamless decorative board panels that are suitable for use in high and low abuse areas such as toilets and showers. These can be hosed for easy cleaning.

Panels

- 13mm Laminex Compact Laminate

Edge Treatment

- None (oil will enhance black edge)

Applications

- Offices & Factories
- Hotels & Restaurants
